

Manoj Madduri Full Stack Developer

✉ mmadduri838@gmail.com ☎ 573-382-5732 📍 Duluth, GA 🌐 LinkedIn 🐙 GitHub 📁 Portfolio

Profile

Results-oriented Full Stack Developer with over 5 years of experience in building scalable, high-performance server-side applications. Proficient in Java programming, Spring Framework, and Hibernate for seamless data integration. Strong expertise in developing RESTful APIs, implementing micro services architecture, Docker, Cloud Services and optimizing application performance for high concurrency.

Skills

Front-end Technologies: HTML5, CSS3, JavaScript, React.js, Angular, Bootstrap, jQuery, AJAX, Redux, TypeScript

Backend Technologies: Java, C, C++, C#, Spring Boot, PHP, Hibernate, Node.js, Express.js, MVC Framework, SOAP, RESTful APIs, Maven, Micro-services, Spring, Spring Data, JDBC, JPA, Python, .Net, Kafka Ruby, SCALA, Struts, ASP, Webservices, API, Code Review, Linux, Unix

Database: MySQL, NoSQL MongoDB, PostgreSQL, SQL Server, Oracle, Firebase, Cassandra

Tools and Technologies: Git, Docker, Kubernetes, Apache, Microsoft Azure, CI/CD, JUnit, Mockito, Swagger, Postman, Jenkins, Jira, Gradle, Jest, Selenium, Agile, Scrum, AWS (EC2, lambda, Auto scaling, SNS), Data Structures, Design Patterns, HTTP, TCP, IP, JSON, Communication Skills, software development life cycle, Cloud Computing

Professional Experience

Full-Stack Developer, Capgemini

01/2023 – present | Remote, USA

- Contribute to the development of a robust, scalable, and maintainable web application by utilizing advanced MongoDB database schema design and data modeling techniques to enhance data storage efficiency and retrieval speed.
- Implement AWS cloud services, including EC2 for compute capacity, RDS for managed databases, S3 for storage, CloudWatch for monitoring, and IAM for access control, enhancing scalability, reliability, and security of the application
- Develop a Java Spring Boot application to create RESTful APIs for an Online Bookstore, seamlessly integrating complex business logic, efficient data processing, and database interactions to power front-end features.
- Utilized micro services architecture to decouple and modularize different components of the Online Bookstore system, facilitating easier maintenance, scalability, and independent deployment of services using test Driven Development.
- Manage Docker containerization for the Online Bookstore to streamline deployment across various environments, while implementing CI/CD pipelines via Jenkins for automated build, test, and deployment processes.
- Implement unit and integration testing using JUnit, engaging in code reviews and rigorous QA procedures to facilitate swift bug detection and resolution, thereby bolstering application reliability and correctness.

Full-Stack Developer, Genpact

01/2021 – 07/2021 | Hyderabad, India

- Created a scalable, maintainable, and high-performance e-commerce platform with an efficient MySQL database schema and data models for optimal data storage and retrieval.
- Generated interactive and responsive user interfaces for the E-Commerce Platform using HTML, CSS, jQuery, and modern JavaScript frameworks, ensuring accessibility across various devices and screen sizes.
- Developed RESTful APIs with Java and Spring, integrated Bootstrap for front-end, and implemented business logic and data processing for the E-Commerce Platform, enabling seamless user interactions and database operations.
- Integrated Spring Boot and Spring MVC frameworks to leverage their features for building robust, scalable, and maintainable components within the E-Commerce Platform, enhancing modularity and ease of development.
- Implemented Azure Cloud Services for deploying and managing the scalable infrastructure of the E-Commerce Platform, ensuring high availability, fault tolerance, and elastic scaling capabilities to handle variable workloads efficiently. Utilized
- Developed and maintained several .NET applications, leveraging C# and ASP.NET for backend services, ensuring high performance and scalability.

Software Developer, Keus Automation

01/2018 – 01/2021 | Hyderabad, India

- Developed enterprise-grade applications for an extensive three-year period, overseeing each stage from inception to deployment, ensuring seamless user experiences and robust functionality.
- Played a pivotal role in ensuring code quality by conducting comprehensive reviews and troubleshooting to optimize system performance and reliability.
- Utilized a diverse toolkit encompassing HTML, CSS, Bootstrap, React, Redux, and JavaScript to craft intuitive and engaging user interfaces, enhancing usability and accessibility across diverse projects. Collaborated cross-functionally with design, backend, and QA teams to ensure seamless integration and functionality.
- Proficiently managed database operations on Oracle, adeptly crafting intricate queries and procedures to maintain data integrity and streamline information retrieval processes.
- Collaborated seamlessly with interdisciplinary teams to introduce and integrate emerging technologies like React and Redux, elevating application capabilities and user satisfaction.
- Demonstrated proficiency in version control practices, server-side scripting with PHP, and advanced code editing techniques, fostering a culture of continuous improvement and innovation within development workflows.

Education

Master's degree, Christian Brothers University
Computer Information Systems

08/2021 – 12/2022 | Memphis, USA

Bachelor of Technology, NRI Institute of Technology
Electrical and Electronics Engineering

05/2014 – 09/2017 | Guntur, India
